JUNO - CONSTITUTION

Established on December 12th, 2022.

The JUNO Constitution sets unbendable standards (articles) for governance of the Juno distributed ledger.

This preamble serves as an introduction to the JUNO Constitution & furthermore frames the constitutional genesis via articles 1, 2 & 3.

The JUNO constitution does not act retroactively. All past or unresolved on-chain governance disputes do not fall under the articles of the constitution.

## **Article 1.0**

**Juno on-chain governance shall make amendments or propose new articles to the constitution if a supermajority (2/3 of present voting power) approves of given changes.**

## **Article 2.0**

**No private\* account on the Juno ledger shall be deprived of liberty or property, nor shall private property be taken from private accounts for public use.**

*\*a private account is any account on the Juno blockchain that is not explicitly created and administered by Juno Governance. Private accounts can come in many different forms, including but not limited to: cryptographic keypairs, smart contracts, networking ports, and cosmos-sdk modules.\**

## **Appendix 2.1**

*Accounts explicitly created by Juno on-chain governance as branches of Juno on-chain governance are subject to the controls decided upon at the time of creation.*

## **Appendix 2.2**

*The vested multi-signature account maintaining the (Core Infrastructure Development Reserve) is a private account. However, a JUNO governance supermajority vote maintains emergency powers to redirect un-vested funds allocated for the Juno Core Development Reserve to another private account.*

## **Article 3.0**

**Social consensus via on-chain governance shall be the unbendable standard for decision-making related to the JUNO distributed Ledger.**

By voting YES on proposal #61, you approve that the JUNO constitution should come into effect upon passing of this proposal.

By voting NO on proposal #61, you disapprove that the JUNO constitution should come into effect upon passing of this proposal.

By voting ABSTAIN on proposal #61 you ABSTAIN from making a ruling.

By voting NO w VETO on proposal #61 you expresses that you would like to see depositors penalized by revocation of their proposal deposit, and contributes towards an automatic 1/3 veto threshold.

This draft is a collaborative effort from Lobo, Rarma, MaxJuno, Pupmos, Jake H., Jack Z., Kevin G, Nullmames, Dimi A. and Jacob G & an array of Juno Commonwealth contributors.
